

Mould Free Bath Mat

This Mould-Free Bath Mat is designed to help prevent slipping and falling whilst taking a bath or whilst showering in the bath. The specially designed suction cups, combined with the mat's extra large size, give you and your family extra protection.

It's unique suction cups are part of the main body of the mat. They not only provide an effective anchor to the bath as well as a "toe grip" safety surface, but also create comfortable, soft cushions of air for a massage effect. Made from vinyl, it won't mildew, discolour or peel. It will not harm your bath and with care, will remain soft, pliable and luxurious to the touch. Easy to keep clean, it's machine washable.

INSTRUCTIONS FOR BATH MAT USE:

1. Unroll mat and allow to lay flat for 24 hours before using. Reverse rolling the mat may help to settle flat. We recommend you soak the mat in warm water for 10 minutes prior to first use.
2. The bath or shower floor must be clean and free of any dirt or oils. Do not use the mat on a textured surface, as the suction cups will not hold properly.
3. Before filling the bath, centre the mat carefully in the bath with suction cups on the underside.
4. Fill the bath to the desired level of water. Firmly press on the entire mat surface with your hands whilst kneeling outside of the bath on a clean surface.
5. Step carefully on the mat whilst holding a grab bar, edge of bath or other secure object.
6. Step firmly on at least 8 to 10 places to achieve proper vacuum hold.
7. Your weight should firmly anchor the mat. If the mat is not firmly anchored, repeat the process above.
8. After use, lift the mat at one corner and peel back. Rinse thoroughly and hang to dry. Do not dry with a hair dryer or over radiator.

CAUTION: DO NOT USE THE MAT IF IT IS NOT FIRMLY SECURED TO THE BATH SURFACE.

It is not recommended for use on textured surfaces. Keep bath surface clean. Bath oils may reduce the mat's safety. Please be sure all safety precautions when entering and exiting the bath, as well as when in the bath. The mat is designed to help prevent slipping, but effectiveness of mat depends on your use and care.
