

# Flexible Garden Hose

## INSTRUCTION MANUAL

Model No. EL2254

Please read carefully before use and keep for future reference

- 1 Hose (1 x)
- 2 Quick coupling socket (2 x, mounted on the hose)
- 3 Sprinkler attachment (1 x)
- 4 Double connector (1 x)
- 5 Quick coupling connector (1 x, already mounted on the sprinkler attachment)
- 6 Spray mist attachment (1 x)

### Use

1. As you require, plug the spray mist attachment or the sprinkler attachment onto the hose until it engages.
2. The three wings of the sprinkler attachment can be rotated about their own axis. To ensure that the sprinkler attachment rotates during operation, align all wings so that the water outlet nozzles do not point upwards or downwards, but approx. 45° to the side, and all point in one direction.
3. Attach the hose to a tap or a garden hose which is connected to a tap. To do this, use the double connector.
4. Bend the hose into shape as required or wrap it around an object or tree.
5. Open the tap to start watering.
6. Close the tap after use.
7. Pull the quick coupling sockets of the hose off the spray mist/sprinkler attachment and off the tap/garden hose.
8. Allow the rest of the water to drain out of the hose
