# GROUT WHITENER

Grout tiles like new again at the stroke of a pen

**Directions:** Shake well before using. Remove cap and simply draw along old, discoloured or painted grout lines between your tiles. Press down hard when first applying to get the liquid inside the pen flowing. Use a thick ruler to help you recolour straight lines. The tile grout whitener pen will dry very quickly and is water resistant.

**Ingredients:** Ethanol (38%); Isopropanol (16%); Sorbitan monolaurate, Ethoxylated (0.8%); Titanium dioxide (12.2%); Ethyl Acetate (20%); Maleic Resin(13%).

Tested and certified  
to British Standards

1/5 FL OZ.(5.9ml)
