Dear Customer

Thank you for purchasing the Sensor Dehumidifier.

Protect clothes and precious possessions from damp and mildew.

You can sum up British winters in two words: 'chilly' and 'damp'. Central heating solves the first problem, and now this smart new dehumidifier sorts out the second. It's a neat sachet that contains 350 grams of moisture absorbing eco-friendly desiccant silica gel beads. These remove approximately 120ml of moisture from the air by absorbing and storing it. And when the sachet has absorbed all it can, an sensor on the top turns from brown to green - then after just thirty minutes in the oven, it's ready to use again. Ideal for protecting clothes, documents, books and other delicate items from the ravages of mildew and mould, it's perfect for wardrobes, cupboards, drawers and storage chests. Boats, cars, caravans and sheds too - so it makes good sense to order several. Low-tech yet highly efficient, our new dehumidifier is the easy way to stamp out the damp. Size: a compact L19 x W12 x H4cm.

BEFORE USE

Remove from outer packaging. Dispose of the packaging according to the local recycling regulations.

INSTRUCTIONS FOR USE

Position dehumidifier where condensation builds up most. If in a wardrobe please keep out of reach of children. If on a car dashboard do not put in an area that will cause distraction to the driver.

The brown circle in the centre will turn green when it is full and needs to be regenerated. To regenerate dry on a radiator (approx 24 hours) or preheat oven to 70-80°C, when up to temperature place the Sensor Dehumidifier directly on the oven shelf and heat for 30 minutes. Store in a dry and ventilated area, away from fire and heat.

We recommend that you dry out the product every 6 weeks.

**CAUTION! PRODUCT WILL BE HOT AFTER HEATING.
LEAVE TO COOL FOR 10-20 MINUTES BEFORE HANDLING**

⚠ IMPORTANT SAFETY INSTRUCTIONS

When using the Sensor Dehumidifier, basic precautions should always be followed, which include the following:

1. Keep out of reach of children. **DO NOT** let children play with the product or any outer packaging.
2. **DO NOT** use if the outer bag is damaged, and never allow the contents to leak out.
3. **NEVER** touch the contents of the bag.
4. **NEVER** ingest the contents of the bag. If this occurs, seek immediate medical treatment.
5. **DO NOT** place in microwave. Only dry on a radiator (approx 24 hours) or in an oven (do not position by naked flame, max 30 minutes at 70-80°C)
6. **DO NOT** expose the product to a naked flame.
7. **DO NOT** cover the product. **DO NOT** use where there may be contact with food.
8. **DO NOT** position in any place which may potentially obstruct the driver.

⚠ WARNING

This product is intended for domestic use only. Keep out of reach of children.

TECHNICAL SPECIFICATION

Weight: 350g **Materials:** Microfibre Bag. Inner contents: Silica Gel Beads
