Dear Customer

Thank you for purchasing the High Pressure Water Jet.

PARTS

- 1x Water Lance
- 1x Brass Standard Nozzle
- 1x Brass Spray Nozzle
- 1x Hose Connector
- 1x Spare Rubber Washer

NOTE: One of the nozzles will be supplied attached to the tip of the lance, with the other attached to the holder on the side of the lance along with the spare rubber washer.

BEFORE USE

Please screw the black plastic hose connector into the brass collar at the end of the lance. There should already be a washer fitted in the collar, there is also a spare provided for future use. Ensure the hose connector is fully tightened so that it doesn't leak.

INSTRUCTIONS FOR USE

- 1) When the operating handle is at right angles to the lance the water flow is OFF. Connect the hose adaptor to your hose, ensuring that there is a tight fit, and turn on the water supply at the mains tap. As you move the operating lever so that it is pointing towards the back of the lance the water will flow, and move back towards the off position to slow it down.
- 2) If you wish to change the water pattern between a single stream and a flat fan unscrew and swap the supplied brass nozzles, it is recommended to do this when the high pressure water jet is not attached to a hose.
- 3) When not in use turn off water supply at the mains tap, use the operating handle to open the valve on the high pressure water jet to release any water pressure in the hose, then close for storage. For long periods of inactivity it is recommended to disconnect the high pressure water jet and store in a dry area.

DISPOSAL:

- Please respect the environment!
- Dispose of the packaging according to the local recycling regulations.
- Dispose of the appliance at the end of its life span according to environmental considerations.

WARNING

This product is intended for domestic use only.

TECHNICAL SPECIFICATION

Measurements: L49.5xW6xDia.3.5cm.
